📍 Abohar, Punjab, India

EDUCATION

B.E. Computer Science & Engg.

Chandigarh University
2025 – 2029 (Expected)

Class XII — PCM

DAV School, Abohar
Completed 2024

Class X

Assumption Convent School, Abohar
Completed 2022

TECHNICAL SKILLS

ADVANCED

- Flutter
- Firebase
- React
- Next.js
- UI/UX Design

INTERMEDIATE

- C / C++
- HTML/CSS
- Node.js
- Git
- IoT / ESP32

TOOLS & PLATFORMS

- Razorpay API
- WebSockets
- Cloud Functions
- Firebase
- Figma

CORE STRENGTHS

Data Structures & Algorithms

Competitive Programming

Cross-Platform Mobile Dev

Real-Time Systems

Open-Source Contribution

Product Thinking

LANGUAGES

English — Fluent

Hindi — Native

Punjabi — Native

PROFILE

First-year CS student with the output of a seasoned developer — 15+ shipped projects spanning mobile apps, full-stack web platforms, and IoT systems. Strong foundation in data structures & competitive programming, with hands-on expertise in Flutter, Firebase, and React. Driven by curiosity and a bias for building things that actually work.

FEATURED PROJECTS

🛒 Vendr — Full-Stack Service Marketplace

Flutter · Firebase · Razorpay · Cloud Functions

End-to-end service marketplace with **Razorpay payment integration**, **real-time buyer-seller chat** via Firestore streams, and serverless order processing through Cloud Functions.

🎓 CampusConnect — College Utility App

Flutter · Firebase · Firestore

Comprehensive campus platform with a **lost & found board**, café directory, and real-time updates — built for everyday student use at scale.

👗 Digital Wardrobe — Fashion Assistant

React · Node.js · CSS

Personal fashion web app featuring a **sleek React/Node.js dashboard** for wardrobe tracking and outfit inspiration, built entirely from scratch.

🚗 ESP32 RoboCar — IoT Vehicle

C++ · ESP32 · WebSockets · JS

Browser-controlled robotic car using **real-time WebSocket communication**; firmware written in C++ on ESP32 — no app install required.

🏪 CampusMart — Premium Marketplace UI

Flutter · Dark-mode Design System

Polished **dark-mode Flutter marketplace** with a pixel-perfect component library and fluid micro-interactions.

HIGHLIGHTS

- ▶ Active **open-source contributor** — building in public and engaging the dev community on GitHub.
- ▶ Self-taught Flutter developer who shipped **production-quality apps** prior to formal university training.
- ▶ Comfortable across the full stack — from bare-metal **ESP32 firmware** to **cloud serverless functions**.
